

ATHLETIC FACILITIES

HIGH JUMP & POLE VAULT STANDARDS

- 8601 High Jump Standards
- International Pole Vault Standards

World Athletics N: E-99-0059

Ten Year Guarantee on High Jump Standards.

Upright:

5.5" wide x 2.5" deep extruded aluminum with 3/8" wall thickness. Semi-hollow extrusion encloses movable upright

Base:

Fabricated out of 12 gage 2 1/2" x 1 3/4" Double D steel profile with a 100% rust resistant gunmetal finish. Each base is fitted with built in 2"x 3" wheels for tilt and wheel capacity. The ends of the tubes are capped with 100 durometer custom molded plugs. Features adjustable leveling knobs for perfect leveling and stability

Crossbar Holder:

Made of durable rust resistant zinc. Zero adjusting unit allows for accurate height measurements

Height Adjustment:

Easily read in imperial and metric measurements. Height adjustable from 91cm (3') to 2.59m (8'6")

World Athletics N: E-04-0374

510-0817

510-0915:
Base protection pads

510-1021

510-0915:
Base protection pads

One pair of Deluxe Base Protection Pads are Included with both Models.

One pair of Pole Vault Extenders are Included with both Models. These lower the height by THREE Feet for beginning and novice vaulters.

15 year Guarantee on pole vault standards

Upright:

5.5" wide x 2.5" deep extruded aluminum with 3/8" wall thickness. Semi-hollow extrusion encloses movable upright.

Base:

Fabricated for #7 galvanized 100% rust resistant steel. The heavy weight of this base along with the extremely rigid upright allows absolute stability

Offsets:

Powder coated in Optic Yellow color for maximum visibility

Height adjustment:

Easily read in imperial and metric measurements

Height Adjustment:

Made by turning of knob and moving accu-glide system

Base protection pads (Model 510-0915):

A rigid 90" x 32" x 17" Treated Wood frame work completely enclosed and protected by high density graphite foam encased in 21 oz. Vinyl knife coated fabric.

Runway System:

Slides the Uprights forward and backward to the requested position. The adjustment measurements are on the easy to align Velcro backed vinyl strip. Adjustable braking system prevents movement of standards on windy days.

Meets or Exceeds All World Athletics, USAT&F, NCAA, and NHSF Rules and Regulations.
